

1W SURFACE TEMPERATURE SENSOR

SCH 001W

APPLICATION

- In combination with other devices (manufactured by Coster Group), measures the temperature of a fluid flowing in a pipe.
- The part in contact with the pipe is made of brass (material with excellent heat transmission properties); in this brass housing is the temperature sensing element.

Features

• TECHNICAL DATA

Temperature sensing element:

Type: see data sheet

Temperature constant: 3 min.

Measurement range: see data sheet

Protection: IP 54

Cable entry: PG 11

Materials:

Enclosure: NYLON

Contact surface: copper plate

Dimensions: see data sheet

Installation: in contact with pipe

Construction standards: Italian Electrotech. Committee (CEI)

Weight: 140 g
