

## NETWORK MANAGER BACNET MS/TP

# ZHC 602

### APPLICATION

- ZHC 602 is a gateway that enables communication of BACnet/MSTP devices over BACnet/IP. In particular, for Coster Group production applications, it enables communication of ZBC 862 controllers with the WebGarage supervision system. Communication in firmware version 1.0 is only supported via the first RS 485 port of the device
