FOR IMMEDIATE RELEASE

J2 Innovations and Partners Showcase Innovative Smart Building Solutions at IBS Paris 2025

Paris, France – J2 Innovations, a Siemens company and leader in building automation and IoT solutions, will present its latest smart building technologies together with five strategic partners active in the French market, at the 15th edition of Intelligent Building Systems (IBS), taking place on September 30 and October 1, 2025.

The J2 Innovations booth will highlight its open platform **FIN Framework**, the backbone of smart building automation technologies for major OEMs, as well as the company's newest innovations: the advanced generative AI tool **FIN Intelligence** and the embedded controller.

Advanced Technology with FIN Framework

At the heart of the showcase is **FIN Framework** – an open, scalable, and cyber-secure platform designed to simplify building management and IoT operations. FIN enables seamless device integration, making building automation more efficient and transparent.

J2 Innovations will also present **FIN Intelligence**, the latest platform upgrade featuring advanced AI capabilities, including generative AI and large language models, to support building owners, operators, and facility managers. Key features include:

- Intelligent tagging for streamlined project management
- Plant optimization for energy-efficient chiller operations
- FIN Intelligence Assistant, enabling natural language interaction for simplified operations

Partner Applications Powered by FIN Framework

To showcase its collaborative ecosystem, J2 Innovations will host several key partners at its booth, each presenting FIN Framework-powered solutions.

Coster Group

Coster's **WebGarage** is a comprehensive Building Management System (BMS) that allows seamless and remote supervision of installations. It integrates multiple industry-standard communication protocols, ensures high levels of cybersecurity, and offers both on-premises and cloud scalability. Designed for

next-generation building automation, Coster also produces hardware solutions such as controllers, sensors, and actuators.

An Exclusive Experience with J2 Innovations

Visitors to **stand G30-H25** will enjoy live demonstrations of J2 Innovations' technology and discover how FIN Framework and partner solutions are transforming smart building automation. Together, these industry leaders highlight J2 Innovations' role as a front-runner in the future of intelligent systems.

Matteo Pierone, Managing Director of J2 Innovations, stated:

"We are excited to present FIN Framework and FIN Intelligence at IBS Paris 2025. Our collaboration with five outstanding partners underlines the flexibility of our technology and its impact in creating seamless, efficient, and sustainable building solutions in the rapidly evolving French market."
